

Our premium service, **at a not-so-premium-price**, allows you to purchase only the cloud services you need and only for as long as you need them.

ChimeNet's Private Cloud Services

Our private Cloud infrastructure, hosted in our resilient data center in Wallingford, CT, delivers secure, highly available cloud services through a flexible pay-as-you-go consumption model.

As a nimble cloud provider, and Connecticut-licensed Broadband connectivity partner, we will not only tailor our cloud services to align perfectly with your needs and budget but will also design the most cost-effective connectivity solution for connecting your business or organization to our Cloud.

Our Cloud Infrastructure

- Delivers competitively priced cloud computing solutions
- Provides secure, multi-tenancy cloud environments
- Preserves capital budget and allows you to operationalize network infrastructure purchases
- Allows you to purchase only the cloud services you need and only for as long as you need them.
- Allows you to scale your Cloud environment up or down based on changing requirements
- Short-term commitment - minimum one month!
- Is designed and built on industry tested standards and powered by Cisco HyperFlex technology
- Allows for fast, secure physical to virtual (P-to-V) cloud deployments
