

ChimeNet delivers flexible, scalable co-location solutions to ensure network infrastructure is hosted in a **highly-available and secure** data center.

Co-location Services

ChimeNet's co-location services offer an opportunity for businesses to expand an existing data center footprint without additional capital investment or to assist in disaster recovery strategies. ChimeNet has made, and continues to make, significant investments in its colocation data center infrastructure, security and environmental controls.

Cooling and Environment

- Fully redundant APC cooling system designed to support dense blade and storage-oriented environments
- N+1 chiller plant capacity
- Advanced temperature and humidity monitoring and controls

Power

- High density 4,000 watts-per-rack power deployment
- Redundant (N+1) power fed from diverse PDUs
- Power delivered in 20A, 30A or 60A configuration
- Power available in 110V or 208V configurations
- On-site 800kW Kohler generator. Designated as priority fuel delivery facility

Data Center Connectivity

- Regional / National carrier presence
- Tier 3 audited Telco colocation facility
- Diverse building entrances for clients' circuits
- Layer 2 data network for site-to-site customer network connectivity

Security

- Secure co-location data center racks
- Unique access card system control for doors
- Video surveillance (30 day archive)
